

Project Design Phase-II

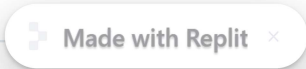

Solution Requirements (Functional & Non-functional)

|              |                                          |               |            |
|--------------|------------------------------------------|---------------|------------|
| Date         | 19 June 2026                             | Team ID       | 24EG105H34 |
| Project Name | HouseHunt – House Rent Management System | Maximum Marks | 4 Marks    |

Functional Requirements

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)                                                |
|--------|-------------------------------|-----------------------------------------------------------------------------------|
| FR-1   | User Registration             | Registration through Form<br>Role Selection (Tenant/Owner)<br>Password Encryption |
| FR-2   | User Authentication           | Login through Email and Password<br>JWT Token Generation<br>Logout Functionality  |
| FR-3   | Property Management           | Add Property<br>Update Property<br>Delete Property<br>View Property Details       |
| FR-4   | Property Search and Filtering | Search by Location<br>Filter by Price Range<br>Filter by Property Type            |
| FR-5   | Booking Management            | Create Booking<br>View Booking History<br>Track Booking Status                    |
| FR-6   | User Profile Management       | View Profile                                                                      |

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)                                  |
|--------|-------------------------------|---------------------------------------------------------------------|
|        |                               | Update Profile Information                                          |
| FR-7   | Admin Management              | Manage Users<br>Manage Properties<br>Monitor Application Activities |

Non-Functional Requirements

Following are the non-functional requirements of the proposed solution.

| NFR No. | Non-Functional Requirement | Description                                                                                               |
|---------|----------------------------|-----------------------------------------------------------------------------------------------------------|
| NFR-1   | Usability                  | The system shall provide a simple, user-friendly and responsive interface.                                |
| NFR-2   | Security                   | The system shall use JWT authentication and bcrypt password encryption.                                   |
| NFR-3   | Reliability                | The system shall provide accurate and consistent data processing.                                         |
| NFR-4   | Performance                | Login response time should be less than 2 seconds and property search less than 3 seconds.                |
| NFR-5   | Availability               | The system shall be accessible anytime through web browsers.                                              |
| NFR-6   | Scalability                | The system shall support future enhancements such as online payments, chat system and mobile application. |
| NFR-7   | Maintainability            | The application shall use MVC architecture and reusable components for easy maintenance.                  |
| NFR-8   | Compatibility              | The system shall work on Chrome, Firefox and Edge browsers and on desktop, tablet and mobile devices.     |
